

APPENDIX 4 B

Board of Regents of the University System of Georgia

APPENDIX 4 B

4. The ESA shall also include abatement recommendations and cost estimates for asbestos or other hazardous materials or for remediation of soil or groundwater contamination (if there is compelling or obvious evidence that such contamination may exist at the site). Any such abatement/remediation recommendations and cost estimates shall be based on collection and analysis of a scientifically and legally defensible number of samples from the subject property. *NOTE: All proposed sampling plans shall be approved by the BOR Director of Environmental Affairs and/or the institution's designated representative prior to proposal acceptance. Building material and soil and groundwater samples shall not be*
